**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 19-20, and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Harman (5,559,423).

Harman discloses a constant voltage supplying circuit having an operational amplifier (54), a first inductance unit (34), a first bypass/filter capacitor (40), and a resistor coupled to the first inductance unit in parallel (see figures 2 and 3). Also, Harman disclose the inductance between the first bypass capacitor and the load is smaller than inductance between the constant voltage supplying circuit and the load (first bypass/filter capacitor (40) is connected closer to the load than the constant voltage supplying circuit connected to the load).

***Allowable Subject Matter***

3. Claims 4-18 and 21-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
